

Let's get this audio started!

### 1. CONNECT AUDIO

Connect the audio source to the AE Server using the provided cables.  
*\*MX3 series uses 3.5mm stereo jacks and MX5 uses RCA.*

The input jacks accept line-level stereo sum to mono input. If stereo output is required, use two audio inputs for L and R audio, then select, "stereo", in the Cloud Server. (See *Cloud Server Setup*.)

### 2. ACCESS NETWORK

Connect the AE Server to your local area network (LAN) via the ethernet port on the back of the server, then plug in the power cable. The LAN should have at least one wireless access point (WAP) and a router, wireless router, or a DHCP server. The server and smart phones need to be on the same public network.

**Quick Tip:** 2.4 GHz bands tend to have higher traffic; 5 GHz or dual-band access points recommended in high-traffic areas.

### 3. DOWNLOAD APP

Download the Audio Everywhere app from the App Store or Google Play. Join the Wi-Fi network associated with the Venue Server (i.e., on the same LAN). Launch the app, select channel to stream, enjoy!

### STEPS TO SUCCESS

Ensure that your investment is a success by utilizing signage, posters, and more to spread the word. Visit [listentech.com](http://listentech.com) for templates and artwork. Email [marketing@listentech.com](mailto:marketing@listentech.com) or call +1.801.542.7768.

#### Did You Know?

The MX3's and MX5's do not generate much heat, only 5 watts fully loaded!

#### Troubleshooting Tip

Experiencing a lack of signal? Check IP addresses on the Venue Server and smart phones to ensure they are on the same public network.

### CLOUD SERVER SETUP *(optional)*

The Cloud Server offers in-app marketing features including banner ads and promotional videos, web-based remote setup and maintenance, and advanced customization. To create an account with the Cloud Server by sending an email to [support@listentech.com](mailto:support@listentech.com) with the following information:

#### *User Setup:*

Last Name  
First Name  
Phone  
E-mail  
AE Server s/n

#### *Company Setup:*

Company Name  
Phone  
Venue Type  
Address  
AE Server s/n

\* Serial number looks like: AEL4 2345 43RF TEW9
